Loading Apps - we have a College iTunes account to download and purchase apps so that you can be sure the app you want is on any ipad you borrow. The app can be copied onto each of our 4 ipads. We will try and organise apps into section folders. Let us know what apps you would like 😊

Important: If you do use your own iTunes account, please go into settings, scroll down to ‘iTunes’, and sign out of your account.

Displaying to a class Using data projectors (and smartboard data projectors) via Lightening to VGA adapter. Please lay the ipad flat to protect the connection.

Warning: turn data projector on after you have used your DEC portal password, otherwise it will be displayed on the screen.

Keyboard - connects via Bluetooth. You need to turn the keyboard on, switch on top right corner. If blue light on keyboard is not flashing press ‘Bluetooth connect’ button, also on top right. If still not connecting, go to ‘Settings’, choose ‘Bluetooth’ and make sure it is ‘On’. Connect by tapping ‘Logitech Ultrathin KB Cover’. Please note that the ipad may get confused if there is another Logitech keyboard within about 4 metres!

Please turn the keyboard off when you have finished.

You charge it by connecting to computer via USB.
